In Action

Hear how CWSI and AIB worked together to create Ireland's first fully digital, automated bank branch. AIB, Ireland's largest bank, needed help with an ambitious digital transformation project to enable a whole new approach to consumer banking on the high street. CWSI created an end-to-end solution architecture, giving AIB the peace-of-mind that the choice of device and Enterprise Mobility Management platform would be compatible with the company's legacy applications, support the required use cases and provide watertight data security.

Evening Session:

Meet The Artist: Remi Rough

Remi Rough is a street and gallery artist from South London, England. He makes work that deals with visual semantics, distilling fragments of the world around him into powerful abstract compositions. His pseudo-sculptural paintings and large-scale murals are instilled with a 'street-wise energy and tension' born from early experiences as a young graffiti writer, painting walls and trains across the world. Remi's work is exemplified by an instinctive use of colour and geometric form, expressed with equal effect when witnessing one of his vast murals or his refined abstract paintings on canvas or panel. His work has been exhibited globally in Hong Kong, London, Los Angeles, Paris, Perth and Tokyo.
His published book 'Lost Colours and Alibis' is a personal collection of images taken from his worldwide travels.
