## Digital Transformation – What Next?

# The shift from Digital Transformation to Digital Survival

The experiences of the past weeks have moved the Digital Transformation debate to the top of the agenda. For some firms it's no longer a matter of adopting 'digital' and refreshing selected existing channels – it's now a full-blown embrace as the socio & economic paradigm we are working through causes them to reflect and assess. What are the ideas emerging for employee duty of care, public perception, customer expectation and regulation? What next for Digital Transformation?
